Language

Hebrew

English

Experience

BELLA - UX/UI Design & Characterization

2026

- Led the end-to-end UX/UI process, from initial user research to the delivery of a High-Fidelity interactive prototype.
- Conducted qualitative research and defined User Scenarios and pain points to formulate personalized design solutions.
- Architected complex Information Architecture and User Flows to ensure a seamless and intuitive user journey.
- Designed high-precision interfaces in Figma, maintaining visual consistency and utilizing advanced Design Systems.

SUPPLY NET - Research & Initial Characterization

2025

- Developed the initial concept and logical characterization for a B2B management system.
- Conducted market research to identify functional requirements aimed at optimizing workflows in complex systems.
- Defined the system's logical components and created initial Wireframes as a foundation for further development.

Voluntree App - Independent Project

2025

- Voluntarily developed and launched a gamified mobile app for Sha'ar HaNegev Regional Council, aiming to strengthen the sense of belonging between youth, local businesses, and the council.
- Led the full product lifecycle: concept, UX/UI design, development (React Native, Supabase), and deployment on the App Store.
- Raised 15,000\$ for the project.

Military service

Commander & Combat Soldier, Paratroopers Brigade

2018 - 2021

- Led a combat team in high-pressure, dynamic environments, requiring rapid decision-making and high personal accountability.
- Managed complex logistics and operational tasks while overseeing the daily routine and welfare of subordinates.
- Coordinated effectively with various command levels and operational stakeholders.
